Tamil
English

PROFILE SUMMARY

Motivated and detail-oriented MCA graduate with hands-on experience in Python full stack development. Proficient in HTML, CSS, JavaScript, React, and Python, with a strong foundation in front-end and back-end development. Skilled in database management and RESTful API design, with practical knowledge of UI/UX principles for creating responsive, user-friendly applications. Completed a comprehensive Python full stack development course with real-world project experience. A proactive problem solver, passionate about learning and innovation, seeking opportunities to contribute technical expertise and grow within a collaborative team environment.

PROJECTS

Bus Ticket Booking Using Python

Developed an interactive bus ticket booking system using Python. The project includes user registration, login functionality, and an intuitive ticket booking interface for various routes. The application ensures secure user authentication and provides detailed route and fare information. This project showcases the ability to build a functional and interactive application from scratch, demonstrating proficiency in Python and the ability to handle user data securely and effectively. It also highlights problem-solving skills in handling real-world scenarios like user authentication and transaction validation.

College Management System Using MySQL

Developed a College Management System to manage student records, course details, professor assignments, and enrollments. Designed and implemented a normalized database schema using SQL, including tables for Students, Courses, Professors, Enrollments, Grades, and Attendance. Created complex queries to handle data retrieval and manipulation. Ensured data integrity with foreign key constraints. Utilized [DBMS, e.g., MySQL] for database management. Demonstrated proficiency in SQL and relational database design.

Zoho Clone Using Front-End

Zoho Webpage Clone (Front-End Development)

Developed a functional clone of the Zoho webpage using modern front-end technologies, with a focus on responsive design and user interface replication. This project aimed to replicate Zoho's clean, intuitive user experience while ensuring compatibility across various devices and screen sizes. Utilized HTML5, CSS3, and JavaScript to replicate the layout, design elements, and responsiveness of the Zoho webpage. This project honed skills in front-end development, design responsiveness, and cross-browser compatibility while reflecting a keen eye for detail in recreating real-world web applications..
